Phone number : +821080091226

PROFILE SUMMARY

Biomedical Engineering graduate (Korea University, 2026) with hands-on research experience in medical imaging, AI-assisted diagnostics, and biomedical data annotation. Skilled in validating and analyzing complex clinical datasets — including MRI/ultrasound imaging and spectroscopic data — using Python and MATLAB. Experienced in rigorous scientific documentation and cross-disciplinary research. Seeking to apply clinical and technical expertise to AI training and medical data quality assurance at TELUS Digital

PROFESSIONAL EXPERIENCES

Head of Public Affairs – Student Association **Aug 2024 – March 2026**
Timor-Leste Embassy Community, Seoul, South Korea

- Coordinated events and programs connecting Timor-Leste students with embassy and external partners
- Assisted in organizing cultural and community activities promoting Timor-Leste in Korea

Research Intern - Medical Imaging System Laboratory **July 2025 - March 2026**
Department of Biomedical Engineering, Korea Univerisity, Seoul South Korea

- Conducted research on ultrasound imaging and deep learning-based beamforming for image reconstruction
- Applied Python and MATLAB for signal processing, data analysis, and imaging simulations using Verasonics systems
- Processed and analyzed large-scale medical imaging datasets for model development and evaluation
- Developed simulation experiments and validated results for imaging performance improvement
- Presented research progress and findings in weekly lab meetings

Research Intern - Nano Bioplasmonic Laboratory (Korea University -KIST) **Sep 2024 - March 2025**
Seoul, South Korea

- Conducted Raman Spectroscopy experiments and analyzed spectral data using machine learning models for classification tasks
- Supported experimental setup, data collection and laboratory documentation

EDUCATION

Higher Education - University
Bachelor of Biomedical Engineering - Korea University, Seoul, South Korea (March 2022 - Feb 2026)

Secondary school
Natural Science Program - Sta. Madalena de Canossa, Dili, Timor-Leste (Jan 2017 - Dec 2019)

SKILLS

LANGUAGE SKILLS

- Tetun - Native
- English - Academic and Professional level
- Korean - Intermediate (TOPIK - level 4)
- Indonesian - Fluent

TECHNICAL SKILLS

- Programming & Data Analysis - Python (Machine Learning, Data Processing) and MATLAB (Data Analysis, Signal Processing, Simulation)
- Data handling tools : VScode, Jupyter Lab and Microsoft Excel
- Visualization & Presentation: Power Point, Canva

LABORATORY & RESEARCH SKILLS

- Medical Imaging data processing and simulation (Ultrasound)
- Experimental data collection and analysis
- Raman Spectroscopy and basic cell culture
- Research documentation and reporting

ADDITIONAL SKILLS

- 3D Modeling (Rinoh, Fusion360)
- Strong Analytical and problem-solving skills
- Ability to work independently and collaboratively
- Adaptability and willingness to learn new system and technologies

ADDITIONAL EXPERIENCE & ACHEIVEMENTS

Global Korea Scholarship (GKS) Recipient – NIIED 2021 – 2026

- Awarded prestigious government scholarship for undergraduate studies in Biomedical Engineering

Global Peace Foundation – Volunteer & Program Organizer

Aug 2024

- Supported the organization of international summer camp programs for diverse participants
- Served as Master of Ceremony (MC) for major event sessions

Korean Dream Crew – Member (Global Youth Program)

Feb 2024 – Aug 2024

- Participated in leadership and cross-cultural collaboration programs
- Recognized 3 times for outstanding team content creation

ASEAN Science, Technology and Innovation Cooperation (STIC)

Sep 2023 – Jan 2024

- Completed online training in Big Data and Cybersecurity
- Strengthened understanding of data systems and digital technologies

Korea University – Presentation Contest Winner

Nov 2022

- Awarded for outstanding academic presentation
